

Secrets to Attracting Any Woman The Fisherman's Guide

A Note from the Author

Hello, my name is Brian Goodwin and I would like to thank you for taking the first step towards attracting the woman of your dreams. I would, also, like to take this time to tell you about myself. I hold several degrees from some of the top schools in the world in the fields of sociology and psychology. I have studied human relationships for many years and have helped men all over the world find the inner confidence to become extremely successful with women. In short, I am a relationship coach for men. I have helped men from all walks of life find the right women for them. It doesn't matter whether you are the CEO of a major business or a line cook at the local restaurant, rich or poor. If you take the time to read all the information that I have gathered through the many years that I have been doing this, then you, too, will be successful at attracting, meeting, dating and seducing any woman you desire.

Before we begin, I'd like to make a few things clear about why this is *The Fisherman's Guide*. I have coached several men throughout all ages of their lives, helping them to attract their desired women and I have found that most of the guys I meet know, at least, a little bit about fishing. And by using references to one of our manliest favorite pastimes, it becomes easier to draw a connection with each lesson learned throughout the book. You see, I want to make it as easy as possible for you, so that you can avoid the mistakes that I made. So grab your tackle box and rod 'n reel and let's bring home that "catch of the day!"

Introduction

The first thing that I want you to know *as fact* is this: Every guy who reads this book has the ability to attract beautiful and desirable women. Believe me when I tell you this because it's true. It doesn't matter where you come from in life, how big your bank account, or how blessed you are in the looks department; you, too, can attract an amazing and beautiful woman by utilizing everything you are going to learn in my book, *Secrets to Attracting Any Woman*.

I know what you are thinking. You are thinking to yourself that I can't possibly know what I'm talking about. Well, I have this to say. If you are reading this book, you aren't happy because you aren't attracting the women you want. I, on the other hand, meet interesting and beautiful women who want to go out with me on a daily basis.

However, this wasn't always the case. In fact, nearly every time I met a woman, I screwed it up somehow or in some way. I, usually, either came off as desperate or I didn't make a move when I needed to, so, in some way, I *always* messed it up. Even when I did get the phone number and the date, I would inevitably do something wrong that would repel the woman I was trying to attract. I can admit it.

I was a complete disaster with women. And it seemed like the more I wanted them, the less they wanted me. Sound like anyone you know?

Maybe it doesn't sound like anyone you know. Or maybe, it sounds exactly like your life. If so, aren't you tired of never getting the girl? Aren't you tired of women laughing behind your back, or worse, laughing to your face? Aren't you tired of watching the other guy at the bar take home the sexiest woman in the room? I know I was. I'm a fisherman and every time this happened to me, it was like watching the "catch of the day" get away. And it never got any easier.

So I decided to do something about it. I mean, if I was fishing and I wasn't catching anything, I would try different lures or techniques. So why was I sticking to the same miserable routine to pick up women? I mean, it obviously wasn't working. The answer is simple. I was stuck. And what was worse was that I didn't know how to get *unstuck*. I honestly had no idea where to begin.

Well, if you are reading this book, then you are a whole lot better off than I was. I had to learn most of this stuff on my own through trial and error and I am a fairly simple guy. I began by getting my degrees in psychology and sociology and then I began to take what I had learned about people in general to formulate a process that works, every time. That's good news, because that means that any man who is willing to read *Secrets to Attracting Any Woman* and utilize the information in it can attract absolutely gorgeous and successful women on a daily basis.

But that is not all this book will do for you. While the main goal of this book is to teach you how to attract amazing women, the side effects from utilizing this information can help you with many other areas of your life. For instance, not only are you going to learn how to initiate and build a relationship with your "catch of the day" but you will also be building new friendships and strengthening old ones. In fact, you will find that all of your relationships will become better just by following the tips and guidelines in this book. That alone is reason enough to start reading immediately, right?

Now, I am going to warn you. You have to be ready to make changes in your life in order to achieve success with this valuable information. By reading *Secrets to Attracting Any Woman: The Fisherman's Guide*, you have to be willing to grow and evolve as a person. You might be reading this book because you want to find the right woman to marry and start a family with, or you might be reading it because you want to meet and date a variety of sexy and attractive women. Maybe you are already in a relationship and you want to find ways of keeping the relationship on track. This book can help you with any or all of that, but, remember, you have to be willing to *make and effect change* in your life. I think that by the end of this book, if you have been open to change, you will know a much better social life than the one you are experiencing now, altogether.

Let's take a minute to look at why men make the decisions that they make. Why do we further our education? So that we can be successful and smart, right? Well, yes, but what drives us to want to be successful and smart? Being successful and smart makes us a productive member of society. It makes us socially valuable to further our education and having value as a person attracts women, which is the goal of most men, especially those reading this book. In fact, any time we do something to increase our value in society, we increase our attractiveness to women.

When men lack social value, they are unattractive to women. Because when you are without value, you lack confidence and without confidence you can't attract amazing women. Why can't you attract amazing women without confidence? Because amazing women have confidence in spades and they are not going to waste their time with a man who is insecure and socially valueless. The entire reason for furthering your education was to increase your social value so that you are more dependable as a person. Incredible and confident women are looking for dependability and if you are going to attract them, you need all the social value you can get. In this book, I'll show you everything you need to know in order to increase your value in a woman's eyes.

Social value isn't *all* you need to land your "catch of the day" by no means, so don't just think that enrolling in some online classes will do the trick. Studying hard and getting your degree can definitely help, but you want to be successful with any woman you choose, right? Well, without *all* the knowledge in this book, it won't matter how many credit hours you complete or how much money you make with that degree. It won't matter how dressed up you are or how muscled up you get at the gym, you still won't be able to achieve the kind of success with women you are after unless you use *every* bit of the information in this book.

Of course, you could get lucky. But, seriously, how's that been working so far? Look, the truth is that you don't want to get lucky. Why? Because being successful with women really has nothing to do with luck. It's all about skill. Luck is out of our control and you want to be *in control*. You *have* to be in control. I can teach you how to always be in control and it's all right in this book. But don't think that just by knowing all this information you will instantly be able to have any woman you want. You only get to do that when you utilize the information. *You* have to put it into use; no one else can do it for you. And you have to practice. Don't expect to be a natural at these skills. If you were a natural, you wouldn't need the book, okay?

You need to begin by figuring out exactly what you want to accomplish with this book. If it's to meet and enjoy the company of a lot of new and exciting women, then you need to read the book with this in mind, so that you remain focused on your goal. See, we as humans like to set goals and achieve them. It's a part of our nature. It is how we have accomplished everything as a species. We could have never gotten to the moon without setting goals and meeting them. And we certainly could have never had that lunar landing if we had simply sat on all the knowledge we gained as we researched how to get to the moon. There were a lot of test flights before we made that "giant leap for mankind." So don't just sit on all the information you are going to learn in this book. Put it to use.

Once you know exactly what you want to get out of *The Fisherman's Guide*, you need to examine *why* you want what you want. Knowing exactly *why* we want *what* we want, makes you more likely to achieve what it is that you want. It's true. So, knowing exactly where you want to be when you finish this book is exactly where you will end up, got it? When I first started this journey, I had a very specific goal in mind. I did not want to miss out on the woman of my dreams. I wanted to be able to recognize her. I wanted to be able to attract her and make her want me, and I eventually wanted to marry her. So now, I know how to spot a woman who has the potential to be the woman of my dreams. I know how to attract that woman, and I know how to grow our relationship.

My point here is that if you go into this with your goal being that you want to sleep with a lot of different women, then that is exactly what you will wind up doing. And if that is what you truly want, then this book will definitely get you to that point, but don't think that you will find that perfect woman to settle down with when your goal all along was just to sleep with different and beautiful women, understand? So know *why* you want what you want and take the time to make sure that your goal is *really* what you want to achieve, okay?

If there is one thing that I have learned from all the years that I have been helping guys in the relationship field, it's that we have all become victims of thinking we want one thing, when actually we wanted something else entirely. So don't fall into that trap. Take days or weeks if you need to in order to figure it all out. Some men are never meant to settle down and a polyamorous lifestyle is exactly what they want out of life. Some men want to enjoy seeing several women as they search for the right one for them. Others just long to meet that perfect woman and settle down to raise a family. Everyone is different and I don't judge people on what makes them happy. Everyone deserves to be happy and everyone has a different view on happiness.

Once you know exactly what you want to get out of this book, the methods and ideas that I am going to teach you will help you achieve it. Why? Because these concepts work no matter what your goal is, they're universal. I have taught all kinds of different guys from all walks of life and this information has worked for all of them, regardless of their goals, so don't think for one second that you are a special case. You're not. You're just a guy like every other guy and this system will work for you if you work for it. It's that simple.

This book contains a wealth of resourceful information. So, even after you read it the first time, continue to keep it on hand for a reference tool. You won't be sorry. In fact, you would find it hard to be in a predicament involving women or relationships where the answer to the problem isn't right in this book. By the time you finish reading *Secrets to Attracting Any Woman*, you will know everything you ever wanted to know to help you attract the woman you desire.

Remember, even those guys who seem to be naturals at attracting incredible women, had to learn it from somewhere. They didn't fall out of the womb knowing all the moves and dripping with charm, right? Of course not. They may have learned it faster or younger or more efficiently, but they still learned it. Good looks only take you so far, remember? To be a real success at attracting women takes a lot of effort, but it's not magic.

You can do it. As a matter of fact, you can be *better* than a guy who's a natural. How? Well, a guy who is a natural at attracting women doesn't understand why it all works. He also doesn't know how to adapt from one situation to the next. He does what he does, because it works in that situation. Now, he may know a thing or two from time to time, but for the most part, this "natural" is relatively clueless. Being clueless can lead to being out of control of the situation. When you understand everything you are doing to attract women and you actually understand why something works, you can never lose control of the situation and you always have the ability to adapt.

CONFIDENTIAL! DO NOT COPY OR STORE!

Life does not always turn out how we think it will. There are always variables beyond our control. When situations change, the “natural” can’t adapt to those changes. Why? Because they just don’t understand. Remember, they are only a natural within the confines of their limited ability. With the information you are going to learn, you will attract women *all the time*. The “natural” may only have the ability to pick up women at a bar. He would probably be clueless if he was anywhere else, you see? With the information in this book, you can lure women to you, anywhere and at any time.

As you read through this book, you will find that there is a lot of information to take in, so I encourage you to take notes. But don’t stop there. Try out what you are learning. That’s the only way you are going to reach your goal. I promise that with practice, you will reach it. So are you ready to change your life and make the “catch of the day”?
